

# Republic for the United States of America

## Mission Statement

Our mission is to restore righteous lawful government to the American People.

This is necessary because of the fraud, abuse and theft perpetrated by a for-profit corporate entity known as the UNITED STATES Government. This entity has been posing as the lawful government for nearly 150 years unawares to most Americans.

### Beliefs

- We hold that the American People have a right to know the whole truth.
- We hold that the American People created a Constitutional Republic for the United States of America and never gave permission for a foreign controlled corporation to govern.
- We hold that the American People have God given unalienable rights as stated in the Declaration of Independence which are reserved exclusively in the Bill of Rights. That no government has any authority to remove, restrict or infringe any of those rights.
- We hold that the National government is bound by the Constitution for the United States of America and has no authority outside of that contract except for those statutes, laws and treaties that are lawfully legislated which are not repugnant to that contract.
- We hold that the American People have a right and duty to re-inhabit their Constitutional Republic for the United States of America.
- We hold to be true the statements of George Washington, John Adams and others who stated similarly, that this form of government would only work for a religious and moral people.
- We hold to and accept the responsibility of self governance as described by the Declaration of Independence.

### Objectives

- Research and uncover the historical events, documents and organic law which established our nation.
- Expose those events and documents which unlawfully changed our form of governance.
- Expose the abuses, fraud and theft committed by the corporation.
- Establish an interim parallel *de jure* Republic for the United States of America until the American People conduct permanent lawful elections.
- Move the American People to an election of office holders and representatives fully restoring the original Constitutional government as defined in the Constitution for the United States of America c. 1789.
